Sequence 10, Application US/09461774

Patent No. 6887481

GENERAL INFORMATION:

APPLICANT: CHUNG, Maxey Ching Ming

APPLICANT: CHUNG, Maxey Ching Ming

APPLICANT: LIN, Renee Lay Hong

TITLE OF INVENTION: Bacterial-derived molecules and therapeutic and

TITLE OF INVENTION: diagnostic uses therefor

FILE REFERENCS: 1781-0180P

CURRENT APPLICATION NUMBER: US/09/461,774

CURRENT FILING DATE: 1999-12-15

NUMBER OF SEQ ID NOS: 22

SOFTWARE: Patentin Ver. 2.1

SEQ ID NO 10

LENGTH: 386

TYPE: PRT
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               / Match 11.6%; Score 410.5; DB 2; Local Similarity 33.3%; Pred. Publication No. US20030129601A1

REMERAL INFORMATION:
GENERAL INFORMATION: COLE, S.T.
TITLE OF INVENTION: COMPARATIVE MYCOBACTERIAL GENOMICS AS A TOOL FOR TITLE OF INVENTION: IDENTIFYING TARGETS FOR THE DIAGNOSIS, PROPHYLAXIS OR TITLE OF INVENTION: TREATMENT OF MYCOBACTERIOSES
FILE REFERENCE: 03495.0218
CURRENT APPLICATION NUMBER: US/10/080,170
CURRENT FILING DATE: 2002-06-10
PRIOR APPLICATION NUMBER: 60/270,123
PRIOR FILING DATE: 2001-02-22
NUMBER OF SEQ ID NOS: 652
SOFTWARE: PATEMENT OF MYCOBACTERIOSES
TYPE: PRI
ORGANISM: MYCOBACTERIUM tuberculosis
ORGANISM: MYCOBACTERIUM tuberculosis
                                                                                                                                                                                        Local Similarity
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            181

Publication No. US20040121322A9

GENERAL INFORMATION: COMPARATIVE MYCOBACTERIAL GENOMICS AS A TOOI

TITLE OF INVENTION: IDENTIFYING TARGETS FOR THE DIAGNOSIS, PROI

TITLE OF INVENTION: TREATMENT OF MYCOBACTERIOSES

FILE REFERENCE: 03495.0218

CURRENT APPLICATION NUMBER: US/10/080,170

CURRENT APPLICATION NUMBER: 60/270,123

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          DB
